3. Another curved line to complete the body.

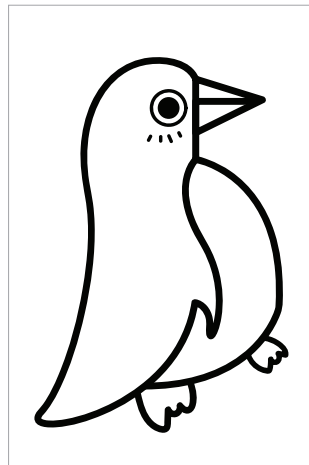

4. A small triangle for the beak.

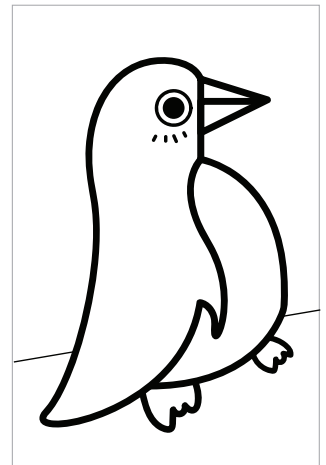

5. Now draw the feet.

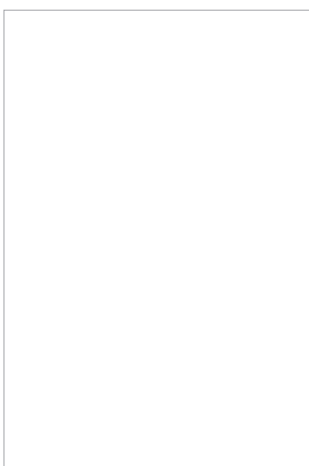

6. Add an eye.

7. Add details on the face.

8. Add any background detail.

9. Practice drawing here.

### Facts -

1. Penguins weigh anywhere from 2lbs to 80lbs.
2. Although penguins are birds, they have flippers instead of wings.
3. Penguins have white bellies so that, while they're in the water, predators cannot distinguish them from the sky above.
4. The average life expectancy of a penguin is 15-20 years.
5. Just like how each human has their own unique voice, each penguin has their own unique call.
